Brief report of the program

The second programme is held on 8th November, 2021 on Skill enhancement and innovative thinking by Mr. Rituraj Tahu, Assistant Professor, Department of Chemistry, Gargaon College. This lecture is delivered after the Nobel Prize is announced for the year of 2021. A link is made between the revolution of science and recent advances in science. Moreover, the lecture elaborately describes the innovative and creative thinking of the scientists and how it influences the newer generation. He also focuses on skill development through innovative steps.

Rationality of the program

Having innovation skills is an asset. It will enable student to solve problems and advance knowledge in their field. Investing in ones own innovation skills can help them become a competitive applicant for top positions and promote career success
