HIGHPOINTS OF THE MENTORING SESSIONS, 2021-22

Name of the Mentor: Dr. Poli Konwar

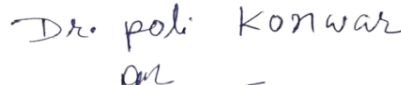

Mentorship is a professional working alliance in which individual work together overtime to support the personal and professional growth and development of students through the provision of career and psychological support.

- At the beginning of the session 2021-22 mentees from 1st, 3rd and 5th semester of education department were assigned to attend regular classes and visited to central library twice in a week. I suggested senior mentees to be friendly with juniors and discussed about anti ragging notice circulated from principal office. I also formed WhatsApp group, so that there could be an uninterrupted flow of communication whenever required. The students could discuss their problems with me through telephone apart from scheduled meeting.
- During the academic sessions 2021-22 the classes started in online mode and later to offline mode. Initial mentoring sessions were held using various online platform like Google meet and WhatsApp. Mentoring sessions were held once in a month for all the mentors together. During this season, topics like necessarily of following covid protocols, career opportunities, how to prepare study materials using online resources etc. were discussed.
- Apart from the mentoring sessions conducted for all the mentors in common, individual mentoring was done to mentees who were identified as slow learners. The performance of some mentees was below the average level of performance of the whole classes. The mentoring sessions helped to identify the causes of the poor performance and the mentees were helped to overcome their learning difficulties after a few personal mentoring sessions.

HIGHPOINTS OF THE MENTORING SESSIONS, 2021-22

Name of the Mentor: Dr. Ratna Das

- The system of mentor-mentee has proved very useful for me in improving my relationship with the students. The slow learner and advanced learner students were identified by me from my group through proper examination of students, after that remedial class were arranged for the slow learner students. These need-based remedial classes have proved very beneficial for the. Students.
- Secondly, the students shared their personal academic problems and as a mentor I tried to solve their problems through personal guidance. The students were also taught how to manage their time for academic activities by giving them special guidance. At the time of examination to motivate the students and to minimize their exam stress special motivational classes were organised by me for the students.
