GARGAON COLLEGE

Water Harvesting

(Perspective plan for Infrastructure Development)

Overview

Water harvesting, often referred to as rainwater harvesting or rainwater conservation, is the art of collecting and storing the precious gift of rain for myriad purposes. Within the enchanting grounds of Gargaon College, a serene pond awaits, dedicated to the collection of this life-giving resource. Moreover, strategically placed overhead tank facilities further enhance the college's commitment to this noble cause. The water reservoirs for rainwater harvesting stand as guardians of sustainability, meticulously maintained to ensure their continued vitality.
